Skills

Programming Languages : Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries : Django, Django REST Framework, Streamlit, LangChain

Technologies : PostgreSQL, MySQL, REST APIs, Git, Tailwind CSS, Bootstrap

AI & ML : Machine Learning, Deep Learning, Soft Computing

Experience

Web Development Intern – Ziuke Infotech

| MAY 2025 – JUNE 2025

- Developed full-stack web applications using **Django** across domains including healthcare, civic management, and real estate, implementing multi-role access control and admin dashboards
- Delivered features such as appointment booking, inventory management, and email notifications across multiple client projects

Projects

Doctor Appointment Booking REST API

| DOCTOR-BOOKING-API-P9SQ.ONRENDER.COM

| [HTTPS://GITHUB.COM/STRANGERTOMYCODE/DOCTOR-BOOKING-API](https://github.com/strangertomycode/doctor-booking-api)

- Built a production-deployed multi-role medical REST API using Django REST Framework with JWT authentication, role-based access control, and auto-generated OpenAPI documentation
- Engineered a deterministic scheduling system with rule-based slot generation and database-level locking (`select_for_update`) to prevent race conditions, deployed on Render with PostgreSQL (Neon)

AI-Powered Web Scraper with Natural Language Parsing

| [HTTPS://GITHUB.COM/STRANGERTOMYCODE/AI_WEB_SCRAPER](https://github.com/strangertomycode/ai_web_scraper)

- Built an intelligent scraper using **Python**, **Selenium**, and **Streamlit** with a modular architecture for real-time DOM cleaning and interactive previews
- Integrated **LangChain** and **Ollama** (Gemma3) for AI-driven parsing, allowing users to extract specific web content using plain English

Lithospheric Strength Estimation Engine

| [HTTPS://GITHUB.COM/STRANGERTOMYCODE/CONVOLUTIONMODEL_2](https://github.com/strangertomycode/convolutionmodel_2)

- Developed a **Python**-based inversion engine to automate moving-window algorithms for estimating the Earth's effective elastic thickness
- Optimized computational efficiency by automating the parameter-sweeping loop across varying window sizes, depths, and densities to objectively identify the lowest-error physical model

Education

Cochin University of Science and Technology

| M.TECH IN COMPUTER SCIENCE AND ENGINEERING (AI & SOFTWARE ENGINEERING)

2024 - 2026

Ahalia School of Engineering and Technology

| B.TECH IN COMPUTER SCIENCE AND ENGINEERING

2020 - 2024

Certifications & Achievements

- **GATE 2025 Qualified [Data Science & AI]**
- Data Analysis with Python Certification – freeCodeCamp
